Mahmut Seliz

Web Developer

PORTFOLİO: mahnuser.dev

SUMMARY

I am **Mahmut**, I have worked as a **FS web developer** before and now I have my company and I am looking for **contract based jobs** or **freelance agreements.** I mostly worked with **Python** and **Javascript.**

I usually use **Python** for automation scripts and local apps, for my websites i use **Javascript** for client side, learning **Typescript** and **Go** for **Cloud functions**.

I use **Windows** on my desktop but also familiar with **Linux** based OS's like **Ubuntu** and use them in daily.

I use **Vim** to improve my keyboard efficiency.

EDUCATION

Near East University
*(Completed 4 years) 2017 – * | Computer Engineering

PROJECTS

- To see my all projects online see **mahnuser.dev**
- I find, define a problem, try to solve it, generalize it and deploy it on **Firebase**. If it is necessary i use **GCP** products.
- I am trying to use **GCP** more active and in-depth.
- I use **Django**, **Flask**.
- I have server with **static IP** and **VPN** deployed on **GCP**.
- I learn **game programming** and **game design concepts**.
- I have **user counter** script app for websites.
- I have a **spam protection middleware** written in **Django** that reduce risk of exploiting **Cloud Function** usage.
- I developed a **link shortener** app.

WORK EXPERIENCE

KREA Digital

I builded chat application that is rely on **Firebase** and **Firestore.**

I developed frontend **extensions**, **popups**, **recommendation algorithms** for e-commerce sites to manage their campaigns, reduce **bounce rates**, and increase **conversion rates** by using **HTML/CSS** and **JS**.

I build a tool for **CRM integration** and Ad Creation with **Google Ads API** for e-commerce websites which is deployed on **Google Cloud.**
